RE: Freedom to Operate (FTO) Opinion regarding [Project/Product Name]

Dear [Client Name],

At your request, we have conducted a freedom-to-operate search and analysis regarding the potential commercialization of [Product Name/Description] (the "Subject Technology"). The purpose of this letter is to provide our legal opinion as to whether the Subject Technology infringes any valid, enforceable claims of currently active patents in [Jurisdiction, e.g., the United States].

1. Scope of Search

Our search was conducted on [Date] using the [Database Name] database. We focused on patents and published applications related to [List Keywords/Technical Classes]. The search was limited to [Country/Region] and covered documents published from [Start Date] to [End Date].

2. Description of Subject Technology

For the purposes of this opinion, we have relied on the technical specifications provided by your team on [Date], specifically [Document Reference/Description]. Our analysis assumes the final commercial product will conform strictly to these specifications.

3. Identified Patents of Interest

Our search identified [Number] patents or patent applications that required detailed analysis. Of these, the following are the most relevant:

- **Patent No. [Number]:** [Brief Title]. Independent claim [Number] directed to [Summary].

- **Patent No. [Number]:** [Brief Title]. Independent claim [Number] directed to [Summary].

4. Non-Infringement Analysis

Based on our review, it is our opinion that the Subject Technology does not infringe the identified patents for the following reasons:

- **Regarding Patent No. [Number]:** The Subject Technology lacks the element of [Specific Element], which is a required limitation of all independent claims. Therefore, there is no literal infringement.
- **Regarding Patent No. [Number]:** [Provide specific technical or legal justification for non-infringement].

5. Conclusion

Based upon the information provided to us and the search results obtained, it is our legal opinion that there is a low risk that the manufacture, use, or sale of the Subject Technology would be found to infringe any valid claim of the patents identified in our search.

6. Limitations

This opinion is based on the patent landscape as of [Date]. Please note that patent searches are not exhaustive and cannot identify unpublished patent applications. This letter is provided solely for the benefit of [Company Name] and may not be relied upon by any other party.

Sincerely,

[Attorney Name]
