RE: Notice of Patent Invalidity and Freedom to Operate Regarding U.S. Patent No. [Patent Number]

Dear [Recipient Name],

We are writing to you on behalf of [Client Name] regarding U.S. Patent No. [Patent Number] (the "Patent"), titled "[Title of Patent]," which we understand is currently assigned to or controlled by [Recipient Name/Company].

Our firm has conducted a comprehensive technical and legal analysis of the Patent in view of the prior art and relevant statutes under 35 U.S.C. §§ 101, 102, and 103. Based on our investigation, it is our professional opinion that the claims of the Patent are invalid and/or unenforceable for the following reasons:

1. Prior Art Anticipation and Obviousness: The claims of the Patent are anticipated by or rendered obvious by prior art references not previously considered by the USPTO, specifically [List Prior Art References, e.g., Patent Numbers or Publications].

2. Lack of Subject Matter Eligibility: The claims are directed toward [abstract ideas/natural phenomena/laws of nature], which are not patentable subject matter under 35 U.S.C. § 101.

3. Failure to Comply with Disclosure Requirements: The Patent fails to meet the enablement and written description requirements of 35 U.S.C. § 112.

Consequently, [Client Name]'s products/services, specifically [Product/Service Name], do not infringe any valid or enforceable claim of the Patent. This letter serves as a formal clearance for [Client Name] to continue its commercial activities regarding the aforementioned technology.

Please be advised that [Client Name] reserves all rights to seek a declaratory judgment of invalidity and non-infringement should any assertion of the Patent be made against them. Furthermore, we invite you to review the attached prior art and provide any evidence you believe supports the validity of the Patent within [Number] days.

We look forward to your response.

Sincerely,

[Signature]
