Re: Freedom to Operate Opinion - [Project/Product Name]

Dear [Contact Name],

1. Introduction

At your request, we have conducted a freedom to operate (FTO) analysis regarding your proposed product, [Product Description/Model Name] (the "Product"). The purpose of this letter is to provide our legal opinion as to whether the manufacture, use, sale, or importation of the Product infringes any valid and enforceable claims of the identified third-party patents.

2. Scope of Search

We performed a search of issued patents and published patent applications in the [Jurisdiction, e.g., United States] Patent and Trademark Office records as of [Date]. Our search focused on the following technical features: [List Key Features Analyzed].

3. Identified Patents of Interest

Our search identified the following patents as potentially relevant to the Product:

- U.S. Patent No. [Number] ("the 'XXX Patent")
- U.S. Patent No. [Number] ("the 'YYY Patent")

4. Non-Infringement Analysis

We have compared the claims of the identified patents to the technical specifications of the Product provided by you on [Date].

Analysis of U.S. Patent No. [Number]:

Independent Claim [Number] requires [Specific Limitation]. The Product does not infringe this claim because it lacks [Specific Element], instead utilizing [Description of Client's Different Technology]. Under the All-Elements Rule, the absence of this limitation precludes a finding of literal infringement.

5. Validity Review (Optional/If Applicable)

[Include brief discussion if any patent claims are suspected to be invalid based on prior art identified during the search.]

6. Conclusion and Opinion

Based on the information provided and the analysis set forth above, it is our professional opinion that the [Product Name] does not infringe any valid and enforceable claim of the patents identified in this study. Consequently, we believe you have freedom to operate regarding the specific features reviewed.

7. Limitations

This opinion is based on the Product specifications provided to us. Any changes to the Product design may alter this analysis. This search is limited to the jurisdictions specified and does not guarantee that other patents do not exist or will not issue in the future.

Sincerely,

[Attorney Name/Signature]
