

NOTICE OF FUMIGATION AND PREPARATION REQUIREMENTS

Property Address: [Insert Address]

Fumigation Date: [Insert Start Date]

Estimated Re-entry Date: [Insert End Date]

Dear Resident/Property Owner,

Your property is scheduled for termite tenting and fumigation. To ensure a successful treatment and the safety of your belongings, you must complete the following preparation steps before the crew arrives.

1. Food and Consumables

- Remove all food, medicine, and pet feed not sealed in metal, glass, or highly specialized Nylofume bags.
- This includes items in the refrigerator and freezer.
- Opened snacks, produce, and cardboard boxes must be removed or bagged.

2. Plants and Pets

- Remove all indoor plants from the premises.
- Remove all pets (including fish and birds).
- Cut back exterior plants at least 12 inches from the building foundation to allow for the tent seal.

3. Interior Access

- Leave all interior doors, closets, cabinets, and drawers open.
- Raise all blinds and open drapes to allow for airflow.
- Extinguish all pilot lights and turn off gas services (if required by your local utility).

4. Exterior Preparation

- Retract all awnings.
- Move outdoor furniture and wood piles away from the building.
- Ensure the technician has access to the perimeter of the structure.

Safety Warning: Do not attempt to enter the building while the tent is up or before the "Safe for Re-entry" sign has been posted. The gas used is odorless and lethal.

If you have any questions or need to purchase specialized bags, please contact us at [Insert Phone Number].

Thank you for your cooperation,
