Re: Genetic Screening Results Consultation

Dear [Patient Name],

I am writing to formally follow up on the results of your recent genetic screening test, [Name of Test], performed on [Date].

The laboratory report indicates findings that are outside of the standard range. Specifically, the screening identified [Brief Mention of Finding, e.g., an increased risk for Trisomy 21 / a carrier status for Cystic Fibrosis].

It is important to understand that a screening test is not a definitive diagnosis. It indicates a statistical probability or a potential carrier status that requires further discussion and, in some cases, diagnostic testing to confirm the results.

I would like to schedule a consultation with you to discuss the following:

- A detailed explanation of the test findings.
- The implications for your health or your pregnancy.
- Options for further diagnostic testing (such as amniocentesis, CVS, or blood work).
- Referral to a genetic counselor for specialized support.

Please contact our office at [Phone Number] at your earliest convenience to schedule an appointment. If you have already scheduled this follow-up, please disregard this notice.

We understand that receiving this information can be concerning and we are committed to providing you with the necessary information and support.

Sincerely,

[Doctor Name/Provider Name]
