RE: CEASE AND DESIST - UNAUTHORIZED INCORPORATION OF OPEN SOURCE SOFTWARE INTO PROPRIETARY PRODUCT

Dear [Recipient Name],

It has come to our attention that your proprietary software product, "[Name of Proprietary Product]," incorporates source code, libraries, or components from the open-source project "[Name of Open Source Project]," which is owned and/or maintained by [Your Name/Company Name].

The software in question is licensed under the [Name of License, e.g., GNU GPL v3.0]. Under the terms of this "copyleft" license, any derivative work or proprietary software that incorporates this code must also be released under the same open-source terms, including the public disclosure of your product's full source code.

Your current distribution of "[Name of Proprietary Product]" as a closed-source, proprietary product constitutes a direct violation of the [Name of License] and an infringement of our intellectual property rights. This "contamination" of your proprietary codebase with our licensed code requires immediate corrective action.

We hereby demand that you:

- Immediately cease the distribution, sale, and licensing of any version of your product containing our code.
- Remove all infringing code from your product or, alternatively, release your entire product's source code under the [Name of License].
- Provide a written accounting of all distributions of the infringing software to date.
- Confirm in writing by [Date] that you have complied with these demands.

Failure to comply with this notice may result in legal action, including but not limited to seeking injunctive relief, damages for copyright infringement, and legal fees.

This letter is sent without prejudice to our rights and remedies, all of which are expressly reserved.

Sincerely,

[Your Signature]

[Your Printed Name]
