Subject: NOTICE OF NON-COMPLIANCE - Open Source Software (OSS) Contamination

Dear [Contact Name],

This letter serves as a formal notice regarding the software deliverables provided by [Vendor Company Name] under the agreement dated [Contract Date] (the "Agreement").

Following a recent technical audit of [Product/Module Name], our team identified the presence of Open Source Software (OSS) components that violate our agreed-upon security and licensing standards. Specifically, we have identified the following issues:

- **Component Name:** [Insert Name/Version]
- **License Type:** [Insert License, e.g., GPL v3, AGPL]
- **Issue:** [Insert Issue, e.g., Unapproved "Copyleft" license, known security vulnerability CVE-XXX, or failure to provide attribution]

Under Section [Number] of our Agreement, [Vendor Company Name] is required to ensure that all deliverables are free from restrictive licenses that would compel the disclosure of our proprietary source code or pose security risks to our infrastructure.

Required Actions:

1. Immediately cease the use of the identified OSS components in future builds.
2. Replace the non-compliant components with approved alternatives or proprietary code.
3. Provide a full Software Bill of Materials (SBOM) for the corrected version.
4. Submit a written remediation plan to us by [Insert Date].

Please acknowledge receipt of this letter and confirm your timeline for resolution. Failure to rectify this contamination may result in further action as permitted under our contract, including termination or indemnification claims.

Regards,

[Your Name]
