Subject: Results of Your Recent Blood Work

Dear [Patient Name],

I am writing to provide you with the results of the liver function tests (blood work) performed on [Date of Test].

The results show that some of your liver enzyme levels are outside of the normal range. Specifically, your [Insert specific test, e.g., ALT, AST, or Bilirubin] levels are elevated.

An abnormal result does not always indicate a serious condition, but it does require further investigation to determine the cause. These elevations can be caused by various factors, including certain medications, alcohol consumption, recent illness, or underlying health conditions.

Next Steps:

- Please schedule a follow-up appointment with our office within [Number] days.
- We may need to perform additional testing, such as repeat blood work or an ultrasound.
- Please bring a list of all current medications and supplements you are taking to your next visit.

If you experience any urgent symptoms such as yellowing of the eyes or skin (jaundice), severe abdominal pain, or dark urine, please contact us immediately or seek urgent care.

You can schedule your follow-up appointment by calling [Phone Number] or through the patient portal.

Sincerely,

[Doctor Signature]
