Dear [Patient Name],

We are writing to inform you of the results from your recent blood work performed on [Date].

Your laboratory results indicate that your kidney function markers (specifically your [Creatinine/eGFR/BUN] levels) are outside of the normal range. While an abnormal result does not always indicate a serious condition, it is important that we monitor these levels and determine the cause.

Next Steps:

- Please schedule a follow-up appointment with [Doctor Name] within the next [Number] days.
- We have ordered a repeat blood test to be completed [at your earliest convenience / before your appointment].
- [Additional instruction: e.g., Please bring a list of your current medications and supplements.]

During your follow-up visit, we will discuss these results in detail, review your medical history, and determine if further testing or changes to your treatment plan are necessary.

If you have any urgent questions before your appointment, please contact our office at [Phone Number].

Sincerely,

[Provider Name/Signature]
