Date of Birth: [Insert DOB]

Dear [Insert Patient Name],

We are writing to provide you with the results of your recent blood work performed on [Insert Date].

Your Hemoglobin A1C level was **[Insert A1C Result]%**.

This result is higher than the target range. A Hemoglobin A1C test measures your average blood sugar levels over the past two to three months. An elevated result indicates that your blood sugar has been higher than recommended, which can increase the risk of long-term health complications.

Based on this result, we would like to schedule a follow-up appointment to discuss your treatment plan, which may include:

- Reviewing your current medications
- Discussing dietary habits and physical activity
- Monitoring blood glucose levels at home
- Referring you to a diabetes educator or nutritionist

Please call our office at [Insert Phone Number] to schedule an appointment at your earliest convenience.

If you are experiencing any urgent symptoms such as extreme thirst, frequent urination, or blurred vision, please contact us immediately.

Sincerely,

[Insert Provider Name]

[Insert Clinic Name]
