

Date: [Date]

Dear [Patient Name],

We are writing to inform you that your recent laboratory results are now available for review.

Test Results: Negative

All tests included in your recent STI/STD panel returned non-reactive or negative results. This means that at the time of testing, no evidence of the infections screened for was detected.

Important Information:

- If you were tested very recently after a potential exposure, please be aware of "window periods." You may need to be re-tested in 3 months for certain infections to ensure complete accuracy.
- If you are currently experiencing physical symptoms, please contact our office to schedule a follow-up appointment, as these results may not account for all possible conditions.
- Continue to practice safe habits and routine screenings as recommended by your healthcare provider.

You can view your full lab report by logging into your secure patient portal.

If you have any questions regarding these results, please contact us at [Phone Number].

Sincerely,

[Provider Name/Clinic Name]
