Dear [Patient Name],

I am writing to inform you that your recent Pap smear results are **normal**. No abnormal cells or signs of cervical cancer were detected in your sample.

This is excellent news. A normal result means that your cervix appears healthy at this time. Based on current medical guidelines and your health history, we recommend that you schedule your next routine screening in [3 or 5] years.

Please note that while this test is a very effective screening tool, you should still contact our office if you experience any new symptoms, such as unusual bleeding or pelvic pain, before your next scheduled exam.

A copy of your results has been placed in your permanent medical record. If you have any questions or would like to discuss these results further, please feel free to call our office at [Phone Number].

Best regards,
