RE: Cervical Screening (Pap/HPV Test) Results

Dear [Patient Name],

We are writing to inform you of the results of your recent cervical screening test performed on [Date of Procedure].

Result: Normal / Negative

Your results show that no abnormal cells were found (Pap test) and/or no high-risk Human Papillomavirus (HPV) was detected. This means your risk of developing cervical cancer before your next scheduled screening is very low.

Next Steps:

Based on current clinical guidelines, you should have your next routine screening in [3 / 5] years, around [Month/Year]. Our office will send you a reminder closer to that time.

Important Note:

While your current result is normal, it is important to contact our office if you experience any new or unusual symptoms, such as abnormal vaginal bleeding, spotting between periods, or pelvic pain, before your next scheduled test.

If you have any questions regarding this result, please call us at [Phone Number].

Sincerely,

[Provider Name/Signature]
