Dear [Patient Name],

We are writing to provide you with the results of your recent Pap smear performed on [Date].

The results show mild dysplasia (also referred to as CIN 1 or LSIL). This means that there are some mild changes in the cells of the cervix. It is important to note that these changes are not cancer. In many cases, these mild changes return to normal on their own without treatment.

Based on these results, we recommend the following follow-up plan:

- [Option 1: A repeat Pap smear and/or HPV test in 12 months.]
- [Option 2: A colposcopy, which is a closer examination of the cervix.]

Our office will contact you to schedule this appointment, or you may call us at [Phone Number] if you have any questions or wish to discuss these results further with your provider.

Please keep a copy of this letter for your records and ensure you continue with your scheduled screenings.

Sincerely,

[Provider Name/Signature]
