[City, State, Zip Code]

Dear [Patient Name],

We are pleased to inform you that the results of your recent screening mammogram performed on [Date of Exam] are **normal**. There were no signs of breast cancer or other significant abnormalities found at this time.

Your results have been assigned the following classification: **BI-RADS 1 - Negative**.

Please keep in mind that a mammogram is a screening tool and does not find all breast cancers. It is important to continue with regular breast self-exams and clinical breast exams by your healthcare provider. If you notice any new changes, such as a lump, skin changes, or nipple discharge, please contact your doctor immediately regardless of this normal result.

Unless your doctor recommends otherwise, we suggest you schedule your next routine screening mammogram in [12 months/one year].

A copy of this report has been sent to your referring physician: [Doctor Name].

Sincerely,

[Radiologist Name/Facility Name]
