RE: Results of your screening mammogram performed on [Date of Exam]

Dear [Patient Name],

We are pleased to inform you that the results of your recent mammogram are **normal**. There was no evidence of cancer or other significant findings in either breast.

Your mammogram has been categorized as **BI-RADS 1 (Negative)** or **BI-RADS 2 (Benign)**, which means the findings are considered normal.

Please keep the following in mind:

- A copy of this report has been sent to your primary care physician, [Physician Name].
- Mammography is an excellent screening tool, but it does not detect all breast cancers. Please continue with monthly breast self-exams.
- If you notice any new changes, lumps, or skin irritations before your next scheduled exam, contact your doctor immediately.
- Unless your doctor advises otherwise, you should schedule your next routine screening mammogram in one year.

If you have any questions regarding these results, please contact our office at [Phone Number].

Sincerely,

[Radiologist Name/Department Representative]
