Re: Normal Mammogram Result

Dear [Patient Name],

We are pleased to inform you that the results of your screening mammogram performed on [Date of Exam] are **normal**. There was no evidence of cancer or other abnormalities found at this time.

A copy of this report has been sent to your primary care physician, [Physician Name].

Please keep in mind the following important information:

- A mammogram is an excellent tool, but it does not detect all breast cancers.
- If you notice any new changes, lumps, or skin thickening in your breasts before your next scheduled screening, please contact your doctor immediately.
- Consistent yearly screenings are the best way to monitor your breast health.

Based on standard guidelines, we recommend your next routine screening in [1 Year / 2 Years]. Our office will send a reminder when it is time to schedule your next appointment.

If you have any questions regarding these results, please call our clinic at [Phone Number].

Sincerely,

[Radiologist/Clinic Name]
