RE: Biopsy Results for [Procedure Date]

Dear [Patient Name],

I am writing to provide you with the results of your recent biopsy performed on [Date] regarding the [Location of Biopsy].

The pathology report indicates that the tissue sample is **benign**. This means that the area tested is non-cancerous. No further surgical intervention is required for this specific site at this time.

While the results are normal, we recommend the following next steps:

- [Follow-up Instruction 1, e.g., Routine screening in 6 months]
- [Follow-up Instruction 2, e.g., Monitor for any physical changes]

A copy of the full pathology report has been placed in your medical record. If you would like a copy for your personal files or if you have any questions regarding these results, please contact our office at [Phone Number].

Sincerely,

[Doctor Signature/Name]
