Re: Biopsy Results for [Date of Procedure]

Dear [Patient Name],

We are writing to provide you with an update regarding the biopsy performed on [Date].

The laboratory has completed its analysis of the tissue sample. The results of this biopsy are currently **inconclusive**. This means that the pathologist was unable to make a definitive diagnosis from the sample provided. An inconclusive result does not necessarily mean there is a cause for concern, but it does mean that we require further information to ensure an accurate assessment.

In cases like this, the next step is typically one of the following:

- A repeat biopsy to obtain a larger or more specific tissue sample.
- Additional specialized testing on the existing sample.
- Close clinical monitoring and a follow-up examination in [Time Frame].

We would like to discuss these options with you in detail. Please call our office at [Phone Number] to schedule a follow-up appointment or a phone consultation with [Doctor Name].

If you have any immediate questions before our meeting, please do not hesitate to reach out to our nursing staff.

Sincerely,

[Doctor Signature]
