RE: Pathology Results from Colonoscopy on [Date of Procedure]

Dear [Patient Name],

We are writing to provide you with the results of the biopsy taken during your recent colonoscopy. The pathology report confirms that the polyp(s) removed were **benign** (non-cancerous).

Specifically, the tissue was identified as: [Insert Polyp Type, e.g., tubular adenoma / hyperplastic polyp]. While these are not cancerous, it is important that they were removed to prevent any future issues.

Based on these findings and the overall results of your exam, your next follow-up colonoscopy is recommended in:

**[Number of years, e.g., 5 years / 10 years]**

Our office will send you a reminder when it is time for your next screening. However, if you experience any new symptoms such as persistent abdominal pain, change in bowel habits, or rectal bleeding before your next scheduled exam, please contact us immediately.

A copy of your pathology report has been placed in your medical record. If you have any questions regarding these results, please call our office at [Phone Number].

Sincerely,

[Doctor Name/Signature]
