[Patient Name]

[Patient Address]

[City, State, Zip Code]

Dear [Patient Name],

I am writing to provide you with the results of your recent lymph node biopsy performed on [Date of Procedure].

The pathology report indicates that the results are **negative**. This means that no cancerous cells or evidence of malignancy were found in the lymph node samples that were tested.

While this is very encouraging news, your overall clinical care continues as planned. I will review these results with you in more detail during your next scheduled appointment on [Date/Time of Appointment] to discuss the next steps in your monitoring or treatment plan.

If you have any urgent questions before our meeting, please contact my office at [Phone Number].

Sincerely,

[Physician Name]

[Practice/Facility Name]
