Dear [Patient Name],

We are writing to inform you of the pathology results for the skin lesion removed from your [Location of Procedure] on [Date of Procedure].

The laboratory analysis shows that the lesion was **benign** (non-cancerous). Specifically, the diagnosis is: [Insert Specific Diagnosis, e.g., Seborrheic Keratosis / Lipoma].

The report also confirms that the specimen had **clear margins**, meaning the entire lesion was successfully removed. No further treatment or surgery is required for this site at this time.

Please continue to monitor the area as it heals. If you notice any signs of infection, such as increasing redness, swelling, or drainage, please contact our office at [Phone Number].

Sincerely,

[Provider Name]
