Re: Notice of Inconclusive CT Scan Results

Dear [Patient Name],

We are writing to provide you with an update regarding the CT scan performed on [Date of Scan] at [Facility Name].

The radiologist has reviewed your images; however, the results are currently inconclusive. This means that the images provided do not show enough detail to make a definitive diagnosis or to fully rule out specific concerns at this time.

Inconclusive results can occur for several reasons, such as image clarity issues, the position of the body during the scan, or findings that require a different type of imaging for better visualization.

To ensure we provide you with the most accurate information regarding your health, we recommend the following next step(s):

- [Option 1: A follow-up scan in X months]
- [Option 2: An alternative imaging test, such as an MRI or Ultrasound]
- [Option 3: A consultation with a specialist]

Please contact our office at [Phone Number] to schedule your follow-up appointment or to discuss these results further with [Doctor's Name].

Sincerely,

[Doctor's Name/Provider Name]
