Subject: Important Information Regarding Your Recent Ultrasound Results

Dear [Patient Name],

We are writing to follow up on the ultrasound performed on [Date of Procedure] at [Facility Name].

The results of your scan were inconclusive. This means that the images captured do not provide a clear enough picture for the radiologist to make a definitive diagnosis or to fully rule out any concerns. This is common and can happen for various reasons, such as the position of the organs, overlying gas, or the limitations of the imaging technology for this specific area.

To ensure we have the most accurate information regarding your health, the following next step is recommended:

- [ ] Repeat ultrasound in [Number] weeks/months.
- [ ] Follow-up with a different imaging study (such as a CT or MRI).
- [ ] Clinical consultation with [Doctor Name].

Please contact our office at [Phone Number] to schedule your follow-up appointment or to discuss these results further with your healthcare provider.

Sincerely,

[Doctor Name/Clinic Name]
