Dear [Patient Name],

We are writing to provide you with the results of your recent Electrocardiogram (ECG/EKG) performed on [Date of Test].

The results of your test have shown some findings that are outside of the normal range. Specifically, the report indicates: [Insert Brief Description of Finding].

While an abnormal result does not always indicate a serious condition, it is important that we discuss these findings in detail to determine the next steps for your care. We would like to schedule a follow-up appointment to review your clinical history and potentially order further diagnostic testing, such as a stress test, echocardiogram, or consultation with a cardiologist.

Please contact our office at [Phone Number] at your earliest convenience to schedule this follow-up visit. If you experience any new symptoms such as chest pain, shortness of breath, dizziness, or fainting before your appointment, please seek immediate medical attention or call 911.

Sincerely,

[Doctor Name/Provider Name]
