Re: Prenatal Screening Results for [Patient Name]

Dear [Patient Name],

We are writing to provide you with the results of your recent prenatal screening test performed on [Date of Test].

The results of this screening indicate an **elevated risk** for [Specific Condition, e.g., Trisomy 21/Down Syndrome].

It is important to understand that this is a **screening test**, not a diagnostic test. An elevated risk result does not mean that your baby has a medical condition; rather, it indicates that further evaluation is recommended to obtain more definitive information.

Because of these results, we recommend the following next steps:

- A consultation with a Genetic Counselor to discuss these findings in detail.
- A detailed Level II ultrasound.
- Discussion of diagnostic testing options, such as Amniocentesis or Chorionic Villus Sampling (CVS).

We have scheduled a follow-up appointment for you on [Date] at [Time] at [Location/Department].

We understand that receiving this news can be stressful. Our team is here to support you and answer any questions you may have. Please feel free to contact our office directly at [Phone Number] if you wish to speak with a provider sooner.

Sincerely,

[Provider Name/Signature]

[Clinic/Hospital Name]
