RE: Lead Screening Results

Dear Parent or Guardian,

We are writing to provide you with the results of your child's recent blood lead screening performed on [Date of Test].

Your child's blood lead level was: [Insert Result] $\mu\text{g}/\text{dL}$.

This result is within the **normal range**. According to current health guidelines, this level does not indicate lead poisoning and no medical action is required at this time.

Even with a normal result, it is important to continue reducing potential exposure to lead by:

- Washing your child's hands and toys frequently.
- Ensuring your child eats a diet rich in calcium, iron, and vitamin C.
- Keeping your home free of peeling paint or dust if it was built before 1978.

We will continue to monitor your child's health and will perform routine screenings at future well-child visits as recommended by state regulations.

If you have any questions regarding this result, please call our office at [Phone Number].

Sincerely,

[Provider Name/Signature]
