

Subject: Important Information Regarding Your Stool Sample Results

Dear [Patient Name],

We are writing to inform you that the results of your recent stool sample analysis, collected on [Collection Date], are inconclusive.

An inconclusive result does not necessarily mean there is a health problem. It simply means that the laboratory was unable to obtain a clear reading from the specimen provided. This can happen for several reasons, including:

- The sample was insufficient in size.
- The sample was contaminated by water or urine.
- There was a delay in the sample reaching the lab.
- Temperature fluctuations during transit.

To ensure an accurate assessment, we require you to provide a new sample. Please follow the steps below:

1. Pick up a new collection kit from [Location/Clinic Name].
2. Carefully follow the instructions included in the kit.
3. Return the sample to the laboratory as soon as possible, ideally within [Number] hours of collection.

If you have any questions regarding the collection process or these results, please contact our office at [Phone Number].

Thank you for your cooperation.

Sincerely,

[Doctor/Provider Name]

[Clinic/Facility Name]
