RE: Results for [Diagnostic Test Name] performed on [Date of Test]

Dear [Patient Name],

We are writing to provide you with an update regarding your recent diagnostic test. After reviewing the results, the findings are currently **inconclusive**.

An inconclusive result means that the test did not provide a definitive "yes" or "no" answer. This can happen for several reasons, such as an insufficient sample size, technical limitations of the equipment, or physiological factors that make the data difficult to interpret clearly.

Please be assured that an inconclusive result is not necessarily a cause for alarm, but it does require follow-up to ensure we provide you with an accurate diagnosis. Our clinical team recommends the following next step:

- [Option: Repeat the test on a different date]
- [Option: Schedule a different type of imaging or blood work]
- [Option: Schedule a consultation with your specialist]

Please contact our office at [Phone Number] at your earliest convenience to schedule your follow-up appointment or to discuss these results further with your healthcare provider.

Thank you for choosing [Hospital or Clinic Name] for your healthcare needs.

Sincerely,

[Provider Name/Signature]
