

[Date]

[Patient Name]

[Patient Address]

[City, State, Zip Code]

Dear [Patient Name],

We are writing to provide an update regarding the results of your recent pathology test performed on [Date of Procedure/Collection].

The laboratory has notified us that the results of your specimen were inconclusive. This means the sample did not provide enough information for a clear diagnosis. This can happen for several reasons, such as the sample size being too small or the cell characteristics being unclear.

Because we cannot make a definitive determination from this initial test, it is necessary for you to return to the clinic for a retest or an additional procedure. This will ensure we have the most accurate information to guide your care.

Next Steps:

- Please call our office at [Phone Number] to schedule your follow-up appointment.
- Your appointment should ideally be scheduled before [Date].
- [Insert any specific preparation instructions if applicable].

We understand that receiving an inconclusive result can be frustrating, and we are committed to getting you clear answers as quickly as possible. If you have any questions, please contact our nursing staff at [Phone Number].

Sincerely,

[Provider Name/Clinic Name]
