Re: Clinical Findings - Testosterone Lab Results

Dear [Patient Name],

I am writing to provide you with the results of your recent blood work performed on [Date].

Your lab results show a **Low Free Testosterone** level of [Insert Value] pg/mL. While your total testosterone may or may not be within the standard range, the "free" portion represents the hormone that is active and available for your body to use.

These findings may correlate with the symptoms you mentioned, such as [List symptoms: e.g., fatigue, decreased libido, or mood changes].

Next Steps:

- A follow-up appointment is required to discuss these results in detail.
- We may need to perform a repeat morning blood test to confirm these levels.
- We will discuss potential underlying causes and various management or treatment options.

Please contact our office at [Phone Number] to schedule your follow-up consultation.

Sincerely,

[Doctor's Signature]
