[Date]

[Patient Name]
[Patient Address]
[City, State, Zip Code]

Dear [Patient Name],

I am writing to provide you with the results of your recent blood work performed on [Date of Test].

The results show that your [Name of Tumor Marker, e.g., CEA, PSA, CA-125] level is elevated at [Result Value], which is above the standard reference range of [Reference Range].

It is important to understand that an elevated tumor marker result does not automatically mean a diagnosis of cancer. These levels can be increased due to inflammation, benign conditions, or other non-cancerous factors. However, this result does require further evaluation to determine the cause.

We would like to schedule a follow-up appointment to discuss these findings in detail and arrange for additional testing, which may include:

- Repeat blood testing
- Imaging studies (such as a CT scan, MRI, or Ultrasound)
- Physical examination

Please call our office at [Phone Number] at your earliest convenience to schedule a consultation. If you have immediate questions, you may also reach out via [Patient Portal/Email].

Sincerely,

[Physician Name]
