RE: Tumor Marker Blood Test Results

Dear [Patient Name],

We are writing to provide you with the results of your recent blood test for [Name of Tumor Marker, e.g., CA-125, CEA, PSA].

Your test result is **[Result Value]**. This result is considered **borderline**, as it is slightly above the typical reference range but does not necessarily indicate a serious medical condition.

It is important to understand that tumor marker levels can be elevated due to a variety of non-cancerous factors, including inflammation, minor infections, or benign cysts. A borderline result is often not a cause for immediate alarm, but it does require professional follow-up to monitor any changes.

Our Recommendation:

- [Option 1: We would like to repeat this blood test in [Number] weeks/months to see if the levels stabilize or return to normal.]
- [Option 2: We have scheduled a follow-up appointment for you on [Date] at [Time] to discuss these results in detail.]
- [Option 3: We recommend a follow-up imaging study, such as an ultrasound or CT scan.]

Please contact our office at [Phone Number] if you have any questions or if you need to reschedule your follow-up appointment.

Sincerely,

[Doctor Name/Provider Signature]
