RE: Routine Screening Tumor Marker Results

Dear [Patient Name],

We are writing to provide you with the results of your recent routine blood work performed on [Date of Test]. This screening included the following tumor marker(s):

- [Marker Name, e.g., PSA, CEA, CA-125]: [Result Value] (Reference Range: [Range])

Result Interpretation:

[Option 1: Your results fall within the normal reference range. No further action is required at this time, and we will continue with your regularly scheduled screenings.]

[Option 2: Your results show a slight elevation. While this does not necessarily indicate a medical problem, we would like to repeat the test or schedule a follow-up appointment to monitor these levels.]

Please note that tumor marker tests are tools used alongside clinical exams and imaging. They can sometimes be influenced by non-cancerous conditions, such as inflammation or infection.

If you have any questions regarding these results, please contact our office at [Phone Number] or schedule an appointment through the patient portal.

Sincerely,

[Physician Name/Provider Name]
