RE: Recent Lab Results - Liver Function Test

Dear [Patient Name],

I am writing to inform you that we have received the results of your recent blood work performed on [Date].

The results of your liver function tests (LFTs) show some values that are outside of the normal range. While an abnormal result does not always indicate a serious problem, it does require further investigation to determine the cause.

Please contact our office at [Phone Number] to schedule a follow-up appointment. During this visit, we will discuss these results in detail, review any symptoms you may be experiencing, and determine the next steps, which may include:

- Repeat blood testing
- Imaging studies (such as an ultrasound)
- Referral to a specialist (Hepatologist or Gastroenterologist)

In the meantime, please continue taking your prescribed medications unless instructed otherwise. If you experience severe abdominal pain, yellowing of the skin or eyes (jaundice), or persistent nausea, please contact us immediately or seek urgent care.

We look forward to discussing this with you soon.

Sincerely,

[Doctor Signature]
