Date of Birth: [DOB]

Patient ID: [ID Number]

Dear [Patient Name],

I am writing to provide you with the results of the skin biopsy performed on [Date of Biopsy] at the site of your [Location of lesion, e.g., left forearm].

The pathology report indicates that the sample is **atypical**. This means the cells do not look completely normal under the microscope, but they do not necessarily meet the full criteria for skin cancer at this stage. However, because these cells have the potential to change or grow further, additional evaluation and treatment are required.

Due to the nature of these results, I have initiated a referral for you to see a Dermatology specialist. They will determine the best course of action, which may include a wider excision (removal of more tissue) to ensure all atypical cells are gone, or close clinical monitoring.

Referral Details:

Clinic Name: [Dermatology Clinic Name]

Phone Number: [Phone Number]

Location: [Address]

Please contact the specialist's office within [Number] business days to schedule your consultation if they have not already reached out to you. It is important to follow up on this referral promptly to ensure the best outcome for your skin health.

If you have any questions regarding these results before your specialist appointment, please contact my office at [Your Phone Number].

Sincerely,

[Provider Name/Signature]
