Subject: Important Health Reminder: Pneumococcal Vaccination

Dear [Patient Name],

Our records indicate that you may be due for a pneumococcal vaccination. As we get older, our immune systems weaken, making it harder to fight off serious infections like pneumonia, meningitis, and bloodstream infections.

The Centers for Disease Control and Prevention (CDC) recommends pneumococcal vaccination for all adults aged 65 or older. This vaccine is a safe and effective way to protect your health and prevent hospitalization.

Please contact our office at [Phone Number] to schedule your vaccination appointment or to discuss your immunization history. If you have already received this vaccine elsewhere, please let us know so we can update your medical records.

Maintaining your vaccinations is one of the best ways to stay healthy and active. We look forward to hearing from you soon.

Sincerely,

[Doctor's Name/Clinic Name]
