Subject: Important Reminder: Your Cervical Screening and Wellness Check

Dear [Patient Name],

According to our records, you are now due for your routine cervical screening (Pap test) and a women's wellness examination. These check-ups are essential for maintaining your reproductive health and detecting potential issues early, when they are most treatable.

A cervical screening is a simple test that looks for high-risk types of human papillomavirus (HPV) or abnormal cell changes. During this appointment, we can also discuss other wellness topics, such as:

- Breast health and mammogram referrals
- Menstrual or menopausal health
- Family planning and contraception
- General lifestyle and preventive health

The appointment usually takes about 20 minutes. If you have had this screening recently at another clinic, please let us know so we can update your medical file.

To schedule your appointment, please call us at [Phone Number] or book online through [Website/Portal].

We look forward to seeing you soon and helping you stay healthy.

Sincerely,

[Doctor/Clinic Name]
