

Subject: Important Information Regarding Your Recent Fecal Test Results

Dear [Patient Name],

We are writing to provide you with the results of your recent fecal test (FIT/FOBT) performed on [Date].

Your test result was **abnormal**, as it indicated the presence of traces of blood in your stool. While an abnormal result can be caused by various factors, such as hemorrhoids or minor inflammation, it can also be an early warning sign of polyps or other concerns in the colon.

Recommendation:

To ensure your health and safety, we recommend that you schedule a **colonoscopy**. A colonoscopy is the most effective way to examine the lining of the colon directly and identify the cause of the blood detected in your test.

Next Steps:

- Please contact our office at [Phone Number] to schedule your procedure.
- Alternatively, you may reach out to the Gastroenterology Department at [Specialist Phone Number].
- Attached you will find information regarding the preparation required for this procedure.

Early detection is vital for effective treatment. Please prioritize scheduling this follow-up as soon as possible.

Sincerely,

[Doctor Name]
