Subject: Important Preventive Health Screening - Prostate Health

Dear [Patient Name],

As part of our commitment to your long-term health, we are reaching out to discuss the importance of routine prostate cancer screening. Regular screenings can help detect potential issues early, when they are most treatable.

Based on your age and health history, we recommend scheduling a preventive consultation to discuss the following:

- The Prostate-Specific Antigen (PSA) blood test.
- A digital rectal examination (DRE).
- Your personal and family medical history.
- The benefits and risks of screening for your specific age group.

Early detection is a key factor in men's health. We encourage you to contact our office at [Phone Number] or use our online portal to schedule an appointment with [Physician Name].

If you have recently had a prostate screening or have already discussed this with your provider, please let us know so we can update your medical records.

Sincerely,

[Physician Name/Clinic Name]
