Subject: Important Information Regarding Your PSA Test Results

Dear [Patient Name],

We are writing to inform you of the results of your recent Prostate-Specific Antigen (PSA) blood test performed on [Date].

Your PSA level was measured at [Result Value] ng/mL. This result is considered higher than the typical reference range for your age group. While an elevated PSA level can be caused by various factors, including inflammation, infection, or a non-cancerous enlarged prostate, it requires further evaluation to rule out prostate cancer.

Because this was a secondary screening, we recommend the following next steps:

- A follow-up consultation with a Urologist.
- Potential diagnostic imaging (such as an MRI).
- Discussion regarding a prostate biopsy, if necessary.

We have scheduled a follow-up appointment for you at our clinic on:

Date: [Appointment Date]

Time: [Appointment Time]

If you need to reschedule or if you have already made arrangements with a specialist, please call our office at [Phone Number].

Sincerely,

[Physician Name]
