Subject: Important Health Reminder Regarding Prostate Cancer Screening

Dear [Patient Name],

Our records indicate that you have reached an age where medical guidelines recommend discussing prostate cancer screening. Regular screening is an important part of preventative healthcare for men as they age.

The standard screening process typically involves:

- A PSA (Prostate-Specific Antigen) blood test.
- A Digital Rectal Exam (DRE).

Because every patient's health history and risk factors are unique, we recommend scheduling an appointment to discuss the benefits and potential risks of screening. This conversation will help us decide on a testing schedule that is right for you.

Please contact our office at [Phone Number] or use our online portal to schedule a "Wellness Consultation" at your earliest convenience.

We look forward to partnering with you in your healthcare journey.

Sincerely,

[Provider Name/Signature]
