RE: Laboratory Results for [Child's Name] (DOB: [Child's Date of Birth])

Dear [Parent/Guardian Name],

I am writing to follow up on the laboratory tests performed for [Child's Name] on [Date of Test].

The results show some values that are outside of the normal range. Specifically, the following area(s) require attention:

- **Lab Test:** [Name of Test]
- **Result:** [Result Value] (Normal Range: [Range])

While these results do not necessarily indicate an emergency, they do require a follow-up discussion and potentially further testing or a change in your child's care plan. To ensure we manage your child's health appropriately, please take the following steps:

1. **Schedule a Follow-Up Appointment:** Please call our office at [Phone Number] within [Number of Days] days to schedule an office visit.
2. **Next Steps:** During the visit, we will discuss [Repeat testing / Referral to specialist / Starting medication].

If you have immediate questions or if your child is experiencing symptoms such as [Specific Symptoms to Watch For], please contact our office immediately or seek urgent care.

We look forward to speaking with you soon to ensure [Child's Name] continues to receive the best possible care.

Sincerely,

[Doctor's Name/Provider Name]
