Subject: Important Information Regarding Your Bone Health Screening

Dear [Patient Name],

As part of our commitment to your long-term health and mobility, we are contacting you to schedule your routine bone density screening (DEXA scan).

As we age, our bones can naturally become thinner and weaker. Osteoporosis is often called a "silent disease" because bone loss typically happens without symptoms until a fracture occurs. Early detection through screening is the most effective way to assess your risk and prevent future injuries.

Screening Details:

- **Test Type:** DEXA (Dual-Energy X-ray Absorptiometry) Scan
- **Procedure:** A quick, painless, non-invasive imaging test that measures bone mineral density.
- **Duration:** Approximately 15-20 minutes.

Please call our office at [Phone Number] to schedule your appointment. If you have had a bone density test performed at another facility within the last two years, please let us know so we can update your medical records.

We look forward to helping you maintain strong bones and an active lifestyle.

Sincerely,

[Provider Name/Signature]
