RE: Non-Urgent Consultation Request for [Patient Name] (DOB: [Date of Birth])

Dear Dr. [Doctor's Last Name],

I am writing to request a non-urgent consultation regarding recent laboratory test results for the patient named above.

The patient's most recent blood work, dated [Date of Test], indicates an elevation in the following biomarker(s):

- [Biomarker Name]: [Result Value] (Reference Range: [Range])
- [Biomarker Name]: [Result Value] (Reference Range: [Range])

While the patient is currently asymptomatic and stable, I would like to seek your specialist expertise to further evaluate these levels, discuss potential underlying causes, and determine if any long-term monitoring or diagnostic follow-up is required.

Please find the attached lab reports and relevant clinical history for your review. We would appreciate it if your office could contact the patient directly to schedule an appointment at your earliest convenience.

Thank you for your time and assistance with this referral.

Sincerely,

[Your Signature/Name]
[Your Professional Title, if applicable]
