Re: Follow-Up Regarding Urine Drug Screen Results

Dear [Patient Name],

I am writing to discuss the results of your recent urine drug screen performed on [Date of Test].

Upon review, the laboratory results show an inconsistency with your current treatment plan and prescribed medications. Specifically, the results indicated the [presence/absence] of [Specific Substance Name], which was not expected based on our previous clinical discussions.

As we discussed at the start of your treatment, consistent monitoring is a required component of our medication management policy to ensure your safety and the effectiveness of your care. Because of this inconsistency, we need to schedule a follow-up appointment to review these findings together.

Please contact our office at [Phone Number] by [Date] to schedule this mandatory review. Please be advised that future prescriptions may be held or adjusted until we have met to discuss this matter.

We remain committed to your health and look forward to resolving this discrepancy with you.

Sincerely,

[Provider Name/Signature]
