

**Date:** [Date]

**Patient Name:** [Patient Full Name]

**Date of Birth:** [DOB]

**Reference Number:** [Reference ID]

Dear [Patient Last Name],

I am writing to formally follow up on our recent discussion regarding the results of your biopsy performed on [Date of Procedure] at [Location/Site].

The pathology report confirms that the tissue sample is **benign** (non-cancerous). Specifically, the findings indicate [insert specific diagnosis, e.g., a fibroadenoma / cyst / inflammation].

While these results are reassuring and no immediate surgical intervention is required, we recommend the following next steps for your care:

- **Monitoring:** [e.g., Routine annual screening / Follow-up imaging in 6 months].
- **Symptom Management:** [e.g., Use warm compresses if discomfort persists].
- **Observation:** Please contact the office if you notice any significant changes, such as rapid growth, increased pain, or skin changes at the site.

A copy of the formal pathology report has been included with this letter for your personal records.

If you have any further questions or would like to schedule an additional consultation to discuss these results in more detail, please contact our office at [Phone Number].

Sincerely,

[Provider Name, Title]

[Practice/Clinic Name]
