Re: Follow-Up Regarding Your Recent Skin Lesion Excision

Dear [Patient Name],

I am writing to follow up on your recent procedure performed on [Date of Procedure] to remove a skin lesion from your [Location of Lesion].

We are pleased to inform you that the pathology results confirm the lesion was benign (non-cancerous). No further surgical treatment is required for this specific site at this time.

As your incision continues to heal, please keep the following in mind:

- **Scar Care:** The area may remain pink or slightly raised for several months. Keep the area protected from the sun with clothing or SPF 30+ sunscreen to prevent dark scarring.
- **Activity:** You may resume normal activities as previously discussed.
- **Monitoring:** While the lesion was benign, please continue to monitor your skin for any new or changing spots.

If you experience any unusual redness, swelling, increased pain, or drainage from the site, please contact our office immediately.

Thank you for choosing us for your care.

Sincerely,

[Doctor Signature/Name]
