

[Date]

[Patient Name]

[Patient Address]

[City, State, Zip Code]

Dear [Patient Name],

I am writing to provide you with the pathology results from your recent mole excision performed on [Date of Procedure] at [Location/Clinic Name].

Pathology Results:

The laboratory analysis of the tissue sample is now complete. The results indicate that the mole was [Benign / Non-Cancerous / Atypical / Malignant]. [Specific details from the report]. Based on these results, [no further treatment is required at this time / a follow-up appointment is necessary to discuss the next steps].

Wound Care and Healing:

As your surgical site continues to heal, please follow these guidelines:

- Keep the area clean and dry.
- Apply [Ointment Name, e.g., Vaseline] daily to keep the wound moist until the skin has fully closed.
- Protect the scar from direct sunlight by using SPF 30 or higher to prevent discoloration.
- If sutures were used, your appointment for removal is scheduled for [Date/Time].

Signs of Infection:

Please contact our office immediately if you experience any of the following:

- Increasing pain or swelling.
- Redness spreading away from the incision site.
- Pus or foul-smelling discharge.
- Fever or chills.

If you have any questions regarding your results or the healing process, please call our office at [Phone Number].

Sincerely,

[Doctor's Name/Signature]
