

Subject: Allergy Test Results - Negative

Dear [Patient Name],

We are writing to provide you with the results of your recent allergy testing panel performed on [Date].

The results of your tests were **negative**. This means that no specific allergic sensitivities were detected for the substances included in this particular panel. While these results indicate that a classic IgE-mediated allergy is unlikely to be the cause of your symptoms, it does not necessarily mean your symptoms are not real.

Negative results can occur for several reasons, including:

- The symptoms may be caused by a non-allergic sensitivity or intolerance.
- The specific trigger was not included in this testing panel.
- The symptoms may be related to another underlying medical condition.

Next Steps:

We recommend scheduling a follow-up appointment to discuss these results in detail and explore other potential causes for your symptoms. Please bring a log of your symptoms and any potential triggers you have noticed to your next visit.

To schedule your follow-up, please call our office at [Phone Number] or use our online portal.

Sincerely,

[Provider Name]
